RENFORTH ANNOUNCES COMPLETION OF DRILL PROGRAM

Toronto – February 19, 2014 – Renforth Resources Inc. (CNSX: RFR) (“Renforth” or the “Company”) is pleased to announce the completion of the previously announced drilling program focused on the Thompson-Cadillac Mine deposit, adjacent to Highway 117 approximately 15 kms west of Malartic, Quebec. The program resulted in a total of six holes drilled, logging has been completed and sampling is ongoing. Visible gold was encountered in drillhole REN-14-11 at 82.4m down the hole where quartz veining was encountered from 75 to 83.4 metres down the hole. Very minor visible gold was also encountered in drillhole REN-14-13 at 68m down the hole.

“We could not be more pleased to have encountered visible gold in this drilling program. Each hole we drilled successfully encountered the known veins at the Thompson-Cadillac mine, in addition to other quartz, sulphide and arsenopyrite mineralization. I am proud to say we ran a successful program on a tight budget, but we will have certainly added value for shareholders based upon what we have seen to date. Now we await the assays.” states Nicole Brewster, President and CEO of Renforth.

Renforth will release further details of the holes drilled and assay results once available.

The technical information in this press release has been reviewed and approved by Brian H. Newton P.Geo, a qualified person pursuant to the guidelines contained within National Instrument 43-101.

ABOUT RENFORTH

Renforth Resources Inc. is a Toronto-based exploration company with interests in two exploration assets: the previously productive New Alger property, located in the Cadillac Break Mining Camp, Québec, and the Mina Pilar Project, located SW of Madrid Spain, also a historic producer of gold.

Forward Looking Statements

This news release contains forward-looking statements and information under applicable securities laws, including with respect to the estimation of a NI 43-101 compliant resource at the New Alger project. All statements, other than statements of historical fact, are forward looking. Forward-looking statements are frequently identified by such words as 'may', 'will', 'plan', 'expect', 'believe', 'anticipate', 'estimate', 'intend' and similar words referring to future events and results. Such statements and information are based on the current opinions and expectations of management. All forward-looking information is inherently uncertain and subject to a variety of assumptions, risks and uncertainties, including the speculative nature of mineral exploration and development, fluctuating commodity prices, the risks of obtaining necessary approvals, licences and permits and the availability of financing, as described in more detail in the Company's securities filings available at www.sedar.com. Actual events or results may differ materially from those projected in the forward-looking statements and the reader is cautioned against placing undue reliance thereon. Forward-looking information speaks only as of the date on which it is provided and the Company assumes no obligation to revise or update these forward-looking statements except as required by applicable law.
